Michal Zindulka

Senior DevOps / Cloud Engineer · Freelance

Google Cloud Certified – Professional Cloud Architect

michal.zindulka@gmail.com · LinkedIn · michalzindulka.cz · Medium

Summary

Senior DevOps / Cloud Engineer with over 10 years of experience, freelancing since 2021. I move companies to the cloud and run what I build: ~10 client migrations to GCP, AWS landing zones designed from scratch, an Azure-to-GCP replatforming that cut infrastructure cost by ~50%, and production Kubernetes on GKE, EKS and AKS. Everything as code with Terraform and GitOps.

AI-oriented: I run a homelab k3s cluster with my own agent platform for agent-driven automation and operations.

Skills

Area	Tools
Cloud	Azure, AWS, GCP, Hetzner, on-prem
Kubernetes	AKS, EKS, GKE, k3s, RKE2, Helm
IaC and config	Terraform, Ansible, Bash, Python
GitOps and CI/CD	ArgoCD, Flux, GitHub Actions, GitLab CI, Azure DevOps
Platform and networking	Linux, VPC / VNet design, hybrid connectivity, DNS, Cloudflare
AI and automation	Coding agents, self-hosted agent platform, MCP, agent-driven operations

Experience

Contract and freelance · 2019 – present

Contractor since 2019, self-employed since 2021 (michalzindulka.cz). Client engagements:

Vortex Cloud (Google Premier Partner) · DevOps Engineer · 09/2024 – present

- Migrated ~10 clients to GCP end to end: technical survey, landing zone and network design, build, migration plan and cutover.
- Built 10+ GKE clusters; moved 50+ VMs, 60+ databases and 100+ microservices.
- Everything as code: Terraform, GKE bootstrapped with ArgoCD (GitOps).

Freelance clients · 2021 – present

- Azure to GCP: complete migration and architecture refactor, from AKS, VMs and App Services to one central platform on GKE. Cut infrastructure cost by ~50%.
- Computer vision platform: took it from proof of concept to production, with AKS in the cloud and a fleet of self-hosted k3s clusters at the edge.
- ML platform: migrated it to Azure on Azure Machine Learning and App Services, all in Terraform, with CI/CD pipelines.
- Migrated 20+ VMs, 5+ AKS clusters, 20+ databases and 50+ microservices to Azure.

EmbedIT · DevOps Engineer · 01/2024 – 07/2024

- Greenfield project for a telco: designed and built the full AWS landing zone and workloads.
- Multiple EKS clusters, network design with Transit Gateway, EC2 workloads.
- Provisioned everything as code with Terraform.

Oriflame Software · Senior System Engineer · 09/2019 – 09/2023

- Ran the Azure platform behind the company's e-commerce business, as DevOps / system engineer.
- CI/CD in Azure DevOps; infrastructure as code with Terraform and Ansible; Kubernetes provisioning and application deployment.
- Day-to-day platform operations and automation.

Employment

IBM, Brno · 2012 – 2019

System Operator (2012) → System Administrator (2014) → System Engineer (2016 – 2019)

Writing

Technical articles on Medium, selected:

- How to Bootstrap GKE Clusters with GitOps and Terraform in Minutes (2025)
- Secure GKE Control Plane in a Modern Way (2025)

- Automate Dynamic Review Environments with ArgoCD (2025)
- My Homelab Journey: How "I Just Want Home Assistant" Turned into a Kubernetes Cluster (2026)
- MCP OAuth Solved by Cloudflare Access (2026)

Education and languages

- ISŠ Sokolnice, Information Technology, 2007 – 2011
- Languages: Czech (native), English (professional working)
